

Optimize your on-site supply chain with safe, reliable logistics operations services

Site Logistics Operations

Railserve can provide complete on-site supply chain management services to coordinate the movement of raw materials from receipt to production to departure within your fence line. We will design a turnkey service package to ensure a fluid on-site supply chain to meet your site's specific requirements (which can include supervision, personnel, insurance, administration, and more.)

Site Logistics Services include:

- **Multimodal transfer** of bulk solid and bulk liquid commodities: Polyethylene, Polypropylene, Glycol, Coal, Ethanol, Crude oil, Condensate, Propane, Butane, Synthetic crude.
- Bulk solids and liquids **loading/unloading** of railcar, truck and barges
- Solids and liquids **packaging**
- **Manage onsite distribution** of railcars, trucks, barges and pipelines
- **Warehousing** and shipping functions
- Quality and assurance **sampling**
- Railcar **switching**
- Railcar **washing**
- Bad order **railcar management**
- **Track maintenance**
- Develop **site specific training and operating procedures**
- Monthly **Key Performance Indicators (KPIs)**

Why Use Contract Site

Logistics Services?

- **Reduces Cost** associated with logistics staff overhead, benefits, and administration
- **Improves Safety** through the use of Railserve technology, operating practices and training
- **Improves Efficiency** of throughput from synergies created by a contractor that specializes in logistics
- **Maintain Compliance** with operating procedures and EH&S requirements
